

Aprilair®

Air Purity Solutions

Whole-Home Air Purifiers

HOUSEHOLD PROBLEM:

Harmful airborne particles like viruses, mold and **allergens** are in your home.

For more information about the health, comfort and structural problems caused by poor indoor air quality, visit aprilair.com

Is the air purity in your home under control?

The air you breathe inside your home could be the most polluted air you breathe all day.

In fact, the EPA has named indoor air pollution as one of the top five environmental risks to public health. With the amount of time spent indoors, it's no wonder so many people suffer from allergies, asthma and illnesses caused by airborne viruses and bacteria.

Aprilaire® can help you control the particles that are harming your home and your family.

Here's what's happening in the air you're breathing right now:

- + Just one cubic foot of air can have more than 30 million pollutants—that's 100 times more than the air outside. Polluted air like this causes 94% of all respiratory problems.*

- + The dust you see on your furniture or floating in front of the window on a sunny day is also entering your lungs. Just one ounce of dust can contain 40,000 dust mites, which aggravate allergy and asthma symptoms.*
- + In addition to visible contaminants, there's an alarming concentration of harmful particles that are invisible to the human eye. Particulate matter like this is the leading cause of poor indoor air, and it's found in 85% of homes.*
- + Every time you dust or vacuum, you actually increase particulate concentration in the air.
- + It's not just your family that suffers. Polluted air can also have a damaging effect on your furniture, appliances and electronics, and especially your heating and cooling system.

Indoor air pollution is a problem in almost every home—including **yours**.

Cleaner, healthier air is within reach with Aprilaire.

A whole-home air purifier from Aprilaire will help you manage your family's comfort, health and protect your HVAC system. Installed as part of your home's heating and cooling system, it puts you in complete control of air purity.

Same protection is recommended for all HVAC types. Including downflow, upflow and horizontal configurations.

Standard 1" Filter

Only 3.4 sq. ft.

LESS media to filter out harmful particles

— CONTROL HEALTH

A whole-home air purifier removes particulates and irritants throughout your home. That includes mold spores, pet dander, dust mites, bacteria, pollen and even viruses. By removing these harmful contaminants, you'll help reduce the risk of asthma attacks and allergic reactions.

— CONTROL DUST

You'll notice less buildup, making your home look and feel cleaner, while protecting furniture and electronics.

Aprilaire Filter

27 sq. ft.

MORE media to filter out harmful particles

— PROTECT YOUR HOME

With a high-efficiency air purifier, you'll keep your air conditioner's cooling coil clean and your furnace working efficiently; saving energy, minimizing repair costs and extending service life. Standard furnace filters are less effective and need to be changed more often.

Clean Coil Guarantee

Aprilaire air purifiers are so effective at removing particles and contaminants that are harmful to your family and your HVAC equipment, we offer you this guarantee: Should your new indoor air conditioning coil require professional cleaning in the next 10 years while properly using an Aprilaire air purifier, we will pay \$100 toward the cost of having the indoor coil cleaned by a licensed contractor. For more details, visit aprilaire.com

Event-Based Air Cleaning —cleaner air on your terms.

One of the many advantages of an Aprilaire air purifier is the ability for you to control both when and how it works. Most whole-home air purifiers work only when your heating or cooling system is running. But what if you're vacuuming and kicking up extra dust? What if it's allergy season, and you and your family are constantly sneezing?

Event-Based Air Cleaning Thermostat

There are special day-to-day situations that make the need for air cleaning more urgent. That's why we offer the Aprilaire Event-Based Air Cleaning Thermostat. It allows you to manage your air purifier with a simple-to-use control that's conveniently located in your living space. Just press the "clean air" button and select the air cleaning mode that's right for your family.

Wi-Fi control of indoor air quality

Aprilaire Wi-Fi thermostats with IAQ Control provide the most convenient and accurate control of air purity and temperature. Event-Based Air Cleaning is integrated into the thermostat and easily controlled from a mobile device. Also, you're notified when your air purifier filter needs replacement. The app also allows you to control other installed Aprilaire IAQ products for optimal fresh air ventilation and humidity levels and keeps you up-to-date about changing climate conditions in your home.

Aprilaire offers a full line of Wi-Fi thermostats for convenient, efficient control of temperature, humidity and all indoor air

Aprilaire—delivering healthy air to your home and family

Aprilaire is the industry leader in humidity control. In 1954, we introduced the first effective whole-home residential humidification system.

Since then, we've continually improved and expanded to meet the growing demand for indoor air quality solutions, including whole-home, high-capacity dehumidifiers. Today, our revolutionary technology continues to set the standard for indoor air quality solutions.

Performance and peace of mind

Aprilaire dehumidifiers are professionally installed and maintained by your local heating and cooling contractor. No matter what model you choose, you can rest assured our dehumidifiers are made to last. Each one is designed and built in the USA and comes with a five-year warranty.
